CareerTech

REGISTER AT OPMUG.ORG

TRAINING OVERVIEW

This Level I course certifies students to significantly improve the maintenance program at their facilities, taking it to a world-class level. This course contains 32 hours of ultrasonic theory and equipment practice focusing on leak detection, electrical and mechanical inspection, steam traps and valves, bearings, lubrication, and more.

TOPICS TO BE COVERED

- Sound theory and ultrasonic principles
- Electrical and mechanical inspection
- Condition-based lubrication
- Bearing monitoring, trending, lubrication, and analysis
- Reporting
- Leak detection
- Steam traps and valves inspection
- Compressed air leak surveys

PRICE

OPMUG Members - \$1295
Regular Price - \$1695

REGISTRATION

Registration will be limited to the first 20 OPMUG members.

INSTRUCTOR

Elmer (EJ) Estates works for UE Systems as a training specialist teaching implementation courses, technical training, and software integration and support. He is certified in Level I and Level II Ultrasound, Vibration, Basic Corrosion, Fall Protection, and Safety. Previously, he worked for BAE Systems as the lead for Ultrasound in the predictive maintenance dept.
