OKLAHOMA
CareerTech

SPEAKER: Eric Foreman, *Customer Operations Executive*

Eric Foreman joined Hendrix Precision Maintenance Services with 18 years of automation and control, maintenance & reliability engineering, and technical standards & training program development in the food and beverage industry.

Eric is an active member in the Midwest maintenance and reliability community serving two years as the SMRP NE/IA Chapter Education & Communication Director and recently was elected Chapter Chair. He holds CMRP, CMRT, and CRL industry certifications.

Eric works under the guiding principle: *make the hard things easy and keep the easy things easy.*

PRESENTATION TOPICS:

Learn how to apply precision maintenance standards and navigate the five manufacturing domains: regressive, reactive, planned, proactive, and strategic.

Session 1 - Technical training and personnel development: A value proposition

Session 2 - How do things/assets fail?

Session 3 - How do we prevent failures?

Session 4 - Developing a technical training & personnel development strategy to support a truly proactive maintenance & reliability program (workshop)

FOOD:

Continental Breakfast: Provided by OPMUG

Lunch: On your own

Afternoon Refreshments: Provided by OPMUG
